

Educating Indiana's Logistics Workforce

The demand for logistics knowledge in today's world is enormous and building the new logistics workforce is truly a team effort with Indiana. Colleges, universities and corporations are working together to arm logistics graduates with the skills they need to meet future workforce demands. Many certification courses and degree programs are focused on introducing project-based work and internship opportunities specifically aimed at providing students with real-world logistics experiences. Other programs target supply-chain management, operations management, logistics and global business as well as the tools, techniques and theories that apply across the logistics industry.

See below for a sampling of colleges and universities in Indiana offering programs in logistics.

Ancilla College

A.S. in Logistics & Inventory Systems
Logistics Certificate
Admissions: 574-936-8898 ext. 330
General: 1-866-Ancilla
Ancilla.edu/degrees/logistics-inventory-systems

Ancilla College's Associate of Science degree in Logistics and Inventory Systems teaches how to apply logistics concepts and principles in a supply chain. Courses and experiences help build a base for continuing logistics education and developing workplace skills in the field.

The Logistics Certificate is a pathway program leading to the associate degree. It designed to provide a broad background and foundation in logistics and inventory systems. This program is endorsed by Conexus Indiana and the North Central Regional Logistics Council.

Ball State University, Muncie

Miller College of Business
